

LIDIYA KOCHERZHUK

Trainee Node.js developer

SUMMARY:

Hello!

I am a persistent, goal-oriented, fast-learning novice Node.js developer.

Although I've not had any commercial experience yet. But, I've been working hard to learn JavaScript and its technologies in the "JavaScript Complex" course by OktenSchool for the last year.

Where:

- I did my homework diligently and usually got good feedback from my mentors.
- And even got the highest score for the "MovieDB(React.js)" project developed.

Also I really value good relations in a team and always supported it in previous jobs. I hope my candidature will suit you and we will be able to create great projects together.
